## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Aguilar et al. (6,017,184). Aguilar et al. disclose a turbocharger comprising a shaft 4; a bearing housing 2; and a turbine housing 1. An end portion of the bearing housing is fastened on to the wall portion of the turbine housing adjacent an opening in the turbine housing and, in an area between the end portion of the bearing housing and the turbine housing is a refractory sealing ring 10 of mineral material or metal (See Figure 1a). The bearing housing also includes a flange (not labeled) that is inserted into a recess of the wall portion of the turbine housing (Figure 1a). The sealing member is located between the flange and the recess.

## **CONCLSUION**

### ***Allowable Subject Matter***

Claim 20 is allowed.

Claims 13-19 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
